NATIONAL WASTE MANAGEMENT HOLDINGS, INC.
CONSOLIDATED NOTES TO THE FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2014 AND 2013

Note 1 – Business Organization

These financial statements represent the financial statements of National Waste Management Holdings, Inc. (“NWMH”) (previously known as Kopjaggers, Inc.) and its wholly owned operating subsidiary, Sand/Land of Florida Enterprises, Inc. (“Sand/Land”). NWMH and Sand/Land are collectively referred to herein as the “Company”. The Company changed its name from Kopjaggers, Inc. to National Waste Management Holdings, Inc. effective October 31, 2014.

On June 16, 2014, pursuant to a share exchange agreement, NWMH merged with Sand/Land of Florida Enterprises, Inc. (“Sand/Land”), a Florida corporation formed as a S-Corporation under the laws of the State of Florida on August 15, 1986, in which the existing stockholders of Sand/Land exchanged all of their issued and outstanding shares of common stock for 47,450,000 shares of common stock of NWMH (the “Reverse Merger”). After the consummation of the Reverse Merger, stockholders of Sand/Land owned 47.45% of NWMH outstanding common stock.

As a result of the Reverse Merger, Sand/Land became a wholly owned subsidiary of NWMH. For accounting purposes, the Reverse Merger was treated as a reverse acquisition with Sand/Land as the acquirer and NWMH as the acquired party. As a result, the business and financial information included in this Quarterly Report on Form 10-Q is the business and financial information of Sand/Land. The accumulated deficit of NWMH has been included in additional paid-in-capital. Pro-forma information has not been presented as the financial information of NWMH was insignificant.

The Company operates as a licensed Construction & Demolition landfill. The Company’s primary operations are based near Tampa, Florida.

Note 2 – Significant Accounting Policies

Basis of Presentation

The financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (“GAAP”).

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements. Actual results could differ from those estimates.

Fair Value of Financial Instruments

For certain financial instruments, including accounts receivable, accounts payable, accrued expenses, interest payable, advances payable and notes payable, the carrying amounts approximate fair value due to their relatively short maturities.

NATIONAL WASTE MANAGEMENT HOLDINGS, INC.
CONSOLIDATED NOTES TO THE FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2014 AND 2013

Note 2 – Significant Accounting Policies (Continued)

Fair Value of Financial Instruments (Continued)

The Company adopted ASC 820-10, "Fair Value Measurements and Disclosures." ASC 820-10 defines fair value, and establishes a three-level valuation hierarchy for disclosures of fair value measurement that enhances disclosure requirements for fair value measures. The carrying amounts reported in the consolidated balance sheets for receivables and current liabilities each qualify as financial instruments and are a reasonable estimate of their fair values because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels of valuation hierarchy are defined as follows:

- Level 1 inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets.
- Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company did not identify any non-recurring assets and liabilities that are required to be presented in the balance sheets at fair value in accordance with ASC 815.

In February 2007, the FASB issued ASC 825-10 "Financial Instruments." ASC 825-10 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. ASC 825-10 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007.

The carrying amounts of cash and current liabilities approximate fair value due to the short maturity of these items. These fair value estimates are subjective in nature and involve uncertainties and matters of significant judgment, and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect these estimates. The Company does not hold or issue financial instruments for trading purposes, nor does it utilize derivative instruments in the management of foreign exchange, commodity price, or interest rate market risks.

Revenue and Cost Recognition

The Company applies paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company recognizes revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the sales price is fixed or determinable, (iii) collectability is reasonably assured and (iv) goods have been shipped and/or services rendered.

FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2014 AND 2013

Note 2 – Significant Accounting Policies (Continued)

Cash and Cash Equivalents

For purposes of reporting cash flows, the Company considers cash and cash equivalents to be all highly liquid deposits with maturities of three months or less. Cash equivalents are carried at cost, which approximates market value.

The Company maintains its cash and cash equivalents at various financial institutions where they are insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000. The balances of these accounts from time to time exceed federally insured limits. The Company has not experienced any losses in such accounts. The Company believes it is not exposed to any significant credit risk on cash and cash equivalents.

Accounts Receivable, Bad Debts and Allowance for Doubtful Accounts

An allowance for doubtful accounts is provided for as a percentage of trade accounts receivable based on historical loss experience. At September 30, 2014 and December 31, 2013, the allowance for doubtful accounts was approximately \$112,000. Bad debt expense recognized for the nine months ended September 30, 2014 and 2013 was \$762 and \$0, respectively. Bad debt expense recognized for the three months ended September 30, 2014 and 2013 was \$0 and \$0, respectively.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost less accumulated depreciation. Expenditures for major additions and improvements are capitalized. As property and equipment are sold or retired, the applicable cost and accumulated depreciation are removed from the accounts and any resulting gain or loss thereon is recognized as operating expenses.

Depreciation is calculated using the straight-line method over the estimated useful lives or, in the case of leasehold improvements, the term of the related lease, including renewal periods, if shorter. Estimated useful lives are as follows:

Transportation equipment	5 years
Office and machinery equipment	5 years
Roll off containers	5-7 years
Airspace	39.5 years

The Company reviews property, plant and equipment and all amortizable intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. Recoverability is based on estimated undiscounted cash flows. Measurement of the impairment loss, if any, is based on the difference between the carrying value and fair value. indicate that the carrying amount of these assets may not be recoverable. Recoverability is based on estimated undiscounted cash flows. Measurement of the impairment loss, if any, is based on the difference between the carrying value and fair value.

Note 2 – Significant Accounting Policies (Continued)

Impairment of Long-Lived Assets and Amortizable Intangible Assets

The Company follows ASC 360-10, "Property, Plant, and Equipment," which established a "primary asset" approach to determine the cash flow estimation period for a group of assets and liabilities that represents the unit of accounting for a long-lived asset to be held and used. Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to sell. Through September 30, 2014, the Company has not experienced impairment losses on its long-lived assets.

Intangible Assets – Customer List

A Customer list was bought from a related party in 2011. It is being amortized over five years.

Advertising Costs

The Company expenses all advertising costs as incurred. Advertising expense for the nine months ended September 30, 2014 and 2013 was \$3,621 and \$4,002, respectively. Advertising expense for the three months ended September 30, 2014 and 2013 was \$1,319 and \$1,308, respectively.

Income Taxes

The Company files income tax returns in the United States and Florida, which are subject to examination by the tax authorities in these jurisdictions, generally for three years after the filing date.

Management has evaluated tax positions in accordance with FASB ASC 740, Income Taxes, and has not identified any tax positions that require disclosure.

Environmental Remediation Liability

The Company accrues for losses associated with environmental remediation obligations when such losses are probable and reasonably estimable. Accruals for estimated losses from environmental remediation obligations generally are recognized no later than completion of the remedial feasibility study. Such accruals are adjusted as further information develops or circumstances change. Costs of future expenditures for environmental remediation obligations are not discounted to their present value. Recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable.

Reclassifications

Certain reclassifications have been made in prior year balances to conform to the current year presentation. Such reclassifications had no effect on net income as previously reported.

FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2014 AND 2013

Note 3 – Going Concern

The financial statements have been prepared on a going concern basis which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. Although the Company has been operating since August of 1986, the Company has suffered consecutive negative cash flows from operations and has limited working capital. The ability of the Company to continue as a going concern is dependent upon its ability to raise additional capital, and ultimately, the achievement of significant operating revenues over operating expenses. The accompanying financial statements do not include any adjustments that might be required should the Company be unable to recover the value of its assets or satisfy its liabilities.

Note 4 – Property, Plant and Equipment

Property, plant and equipment and related accumulated depreciation consist of the following at September 30, 2014 and December 31, 2013:

Note 6 – Commitments and Contingencies

During the normal course of business, the Company may be exposed to litigation. When the Company becomes aware of potential litigation, it evaluates the merits of the case in accordance with FASB ASC 450, Contingencies. The Company evaluates its exposure to the matter, possible legal or settlement strategies and the likelihood of an unfavorable outcome. If the Company determines that an unfavorable outcome is probable and can be reasonably estimated, it establishes the necessary accruals. Certain insurance policies held by the Company may reduce the cash outflows with respect to an adverse outcome of certain of these litigation matters.

The Company currently operates a fully licensed landfill under approval by the Florida Department of Environmental Protection. As such the company has set up a reserve allowance of \$424,596 against estimated future closing cost. As of December 31, 2013 the Florida Department of Environmental Protection has approved the secured letter of credit cash reserve of \$324,950 set aside by the Company at September 30, 2014 and December 31, 2013, respectively, in order to be in compliance with the financial assurance requirements for long term care cost of the facility. It is reasonably possible that the recorded estimate of the obligation may change in the near term.

As discussed in note 7 to the financial statements, as of September 30, 2014 and 2013 and for the nine months then ended, approximately 33% and 15% of the Company's revenues were generated from a related party, respectively and approximately 54% and 53% of net accounts receivable were due from related parties as of September 30, 2014 and 2013, respectively.

Except for our ongoing securities laws, we do not intend, and undertake no obligation, to update any forward-looking statement.

Although we believe that the expectations reflected in any of our forward- looking statements are reasonable, actual results could differ materially from those projected or assumed in any or our forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to change and inherent risks and uncertainties. The factors impacting these risks and uncertainties include, but are not limited to:

- Our results are vulnerable to economic conditions;
- Our ability to raise adequate working capital;
- Loss of customers or sales weakness;
- Inability to achieve sales levels or other operating results;
- The unavailability of funds for capital expenditures;
- Operational inefficiencies;
- Increased competitive pressures from existing competitors and new entrants;
- Competition for acquisition candidates, consolidation within the waste industry and economic and market conditions may limit our ability to grow through acquisitions;
- We may incur charges related to capitalized expenditures of landfill development projects, which would decrease our earnings;
- Pending or future litigation or governmental proceedings could result in material adverse consequences, including judgments or settlements;
- We may be subject in the normal course of business to judicial, administrative or other third-party proceedings that could interrupt or limit our operations, require expensive remediation, result in adverse judgments, settlements or fines and create negative publicity;
- Our accruals for our landfill site closure and post-closure costs may be inadequate;
- Liabilities for environmental damage may adversely affect our financial condition, business and earnings;

- Our financial and operating performance may be affected by the inability to renew landfill operating permits, obtain new landfills and expand existing ones;
- Extensive and evolving environmental, health and safety laws and regulations may restrict our operations and growth and increase our costs;
- Extensive regulations that govern the design, operation and closure of landfills may restrict our landfill operations or increase our costs of operating landfills; and
- Alternatives to landfill disposal may cause our revenues and operating results to decline.

These risks and uncertainties, as well as others, are discussed in greater detail in this Quarterly Report on Form 10-Q and our other filings with the Securities and Exchange Commission, or SEC, including our most recent Annual Report on Form 10-K. There may be additional risks of which we are not presently aware or that we currently believe are immaterial which could have an adverse impact on our business. We make no commitment to revise or update any forward-looking statements in order to reflect events or circumstances that may change.

GENERAL

Overview

We are a landfill service that provides landfill services, roll-off dumpster service, and mulch products. We service the counties of Citrus, Hernando, and Marion in Florida. We average annual disposals of approximately 110,000 cubic yards of construction debris and manage our 54 acre landfill facility. We started operations with one roll-off truck and now operate four trucks and 350 containers. We have maintained a contract with Citrus County Solid Waste Management landfill to back-up their roll-off trucks since 2000.
